BIG 6® MINERAL SALT

Big 6 trace mineralized salt is one of our most popular products. With the six core micro-minerals required for animal health — cobalt, copper, iodine, iron, manganese and zinc — it's the first choice for weight gain, feeding efficiencies and overall herd performance. For all classes of beef and dairy cattle, pigs and horses. This feed contains copper. Do not feed to sheep.

IODIZED SALT

Iodine is essential for proper functioning of the thyroid gland, prevention of goiter and aiding the production of thyroxin — the major hormone that controls basal metabolic rate. For all classes of beef and dairy cattle, sheep, pigs and horses.

COBALT IODIZED STOCK SALT

Cobalt is important for vitamin B12 synthesis, which is essential for thermoregulation, appetite stimulation and normal protein, carbohydrate and mineral metabolism. This product helps prevent the types of mineral deficiencies that can lead to low conception rates, abortions and weak calves. For all classes of beef and dairy cattle, sheep, pigs and horses.

SE-90 TRACE MINERALIZED SALT WITH SELENIUM

Selenium is an antioxidant, which protects against disease by promoting a healthy immune system and regulating an animal's ability to handle stress. For all classes of beef cattle and horses. This feed contains copper. Do not feed to sheep.

HI-SALT® WITH EDDI

Hi-Salt mineralized salt contains more than twice the iodine, iron, manganese and zinc of standard trace mineralized salt. The organic source of iodine in our Hi-Salt product delivers a greater concentration of iodine with the mineralized salt compared with alternative iodized salts. Hi-Salt mineral feed provides nutrients that support improved feed utilization, animal growth and optimized reproduction. For all classes of beef and dairy cattle. This feed contains copper. Do not feed to sheep.

SULFUR SALT

Sulfur is required for proper development of protein, cartilage, bones and tendons. It also plays a role in hair and wool production, as well as regulating fiber digestion and weight gain. For all classes of beef and dairy cattle, sheep, pigs and horses.

TRACE MINERALIZED SALT

With the six core micro-minerals required for animal health — cobalt, copper, iodine, iron, manganese and zinc — Trace Mineralized salt provides nutrients that support weight gain, feeding efficiencies and overall herd performance. For all classes of beef and dairy cattle, pigs and horses. This feed contains copper. Do not feed to sheep.

EQUINE MICRO 100® SALT

Our Equine Micro 100 salt brick is formulated to provide the micro-nutrients required by horses as recommended by National Research Council (NRC) guidelines. Apple flavored for appetite encouragement, this brick offers a powerful antioxidant combination of vitamin E and selenium. The ingredients contained in this formula are known to help fight fatigue, strengthen the immune system, enhance fertility and reduce the chance of stillborn foals. For all classes of horses.

Basic Salt

WHITE SALT

With high purity, our White Salt blocks and bricks are extremely tough and weather resistant. Designed specifically for free-choice feeding. For all classes of beef and dairy cattle, sheep, pigs and horses.

AGRI SALT

Our extremely tough, weather-resistant Agri Salt block is specifically designed for free-choice feeding. Available in limited areas. For all classes of beef and dairy cattle, sheep, pigs and horses.

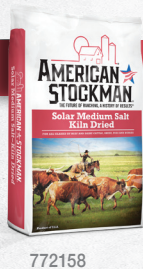

MIXING SALT AND TREATED MIXING SALT

This high-purity rock salt is available in the Great Lakes region. The granules are slightly larger than Fine Stock salt, which makes it a good choice for mixing in feed rations. Available in untreated or treated with the anti-caking agent YPS. For all classes of beef and dairy cattle, sheep, pigs and horses.

SOLAR MIXING SALT

Our finest-grain solar feed salt granules are high purity, thanks to kiln drying and standard evaporation technology from the Great Salt Lake. For all classes of beef and dairy cattle, sheep, pigs and horses.

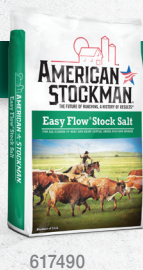

SOLAR MEDIUM SALT

Solar Medium salt contains larger granules, sourced by standard solar evaporation technology from the Great Salt Lake and kiln dried for high purity. For all classes of beef and dairy cattle, sheep, pigs and horses.

FINE STOCK SALT

Our most common feed rock salt, Fine Stock salt is high purity and contains the anti-caking agent YPS. Can be used as a mixing and stock salt for all classes of beef and dairy cattle, sheep, pigs and horses.

EASY FLOW® STOCK SALT

Easy Flow salt is a high-purity evaporated salt. The granule size is smaller than Fine Stock salt and contains the anti-caking agent YPS. For all classes of beef and dairy cattle, sheep, pigs and horses.

MULTI-PURPOSE STOCK SALT

Multi-Purpose salt is our finest rock salt product, with high purity and the anti-caking agent YPS. For all classes of beef and dairy cattle, sheep, pigs and horses.
