

FOR IMMEDIATE RELEASE:

Datamars Livestock is pleased to announce the expansion of the NJ Phillips Disposable Needles and Syringes product line with additional retail and bulk packaging options. This complements our popular Repeaters, Nylons, and VS Injector syringes. Our NJ Phillips products have served the animal health and horticulture industries for over 90 years.

Our complete suite of NJ Phillips Disposables includes aluminum and polypropylene needles, polypropylene syringes, and needle combinations. Each syringe is equipped with prominent, easy-to-read graduations to ensure accuracy when administering vaccines and medications. The aluminum and polypropylene needles are ultra-sharp and feature color-coded gauge caps for effortless identification. Pack sizes for needles, syringes, and needle combinations vary and include many features tailored to meet the animal health industry's diverse needs. With our exceptional account service and customer support, we offer quality products and another choice to any distributor.

Datamars Livestock is dedicated to simplifying the procurement process for its customers. By integrating NJ Phillips Disposables into their orders, customers benefit from a streamlined, one-stop-shop experience. Distributors and dealers enjoy the convenience of partnering with a single vendor for all their animal health needs, optimizing efficiency and reducing complexity in their supply chains.
