Foaming: *Non-Foaming*

Flash Point: *>200° F (non-flammable)*

## SAFETY

Keep out of reach of children.

For industrial and commercial use only.

*Read label instructions and SDS carefully.*

## PRODUCT DESCRIPTION

**Forage Guardian Ultimate** is a concentrated blend of chemicals designed to remove oxygen, prohibit mold growth, increase PH, and lower temperatures within a forage bunker.

It's versatile enough to be altered for bunker specific environments. When all conditions are met, lower dry matter loss, less spoilage, and healthier feed will result.

**Forage Guardian Ultimate** is manufactured by ITC Services. We custom blend for each customer. This allows us to provide a superior product that cannot be duplicated.
