

PARLORPAL®

®

Lower pH with ParlorPal for **HOOF CARE & ODOR CONTROL**

ParlorPal® is a natural mineral acid that lowers the pH of bedding, manure, and footbath water to create a safer environment for animals and workers.

Safer Footbath Solution

Replace hazardous formaldehyde
Replace or supplement copper sulfate to limit copper discharge
For footbaths and spray systems

Reduce Emissions

Immediately eliminate ammonia in calf housing and barns to lower respiratory stress and reduce production losses
Create a safer environment for workers and animals

Lower Operating Costs

Extend use of bedding materials
Supplement or replace more costly copper sulfate in footbaths

Sustainable Manure Management

Lower pH in slurry to keep ammonia in the liquid phase and prevent the production of methanol and ethanol

Control Flies in Calf Hutches

By reducing pH, ParlorPal creates an environment where fly larvae and odor-causing bacteria cannot thrive
