

# Intercept<sup>1316</sup><sup>®</sup> FEND

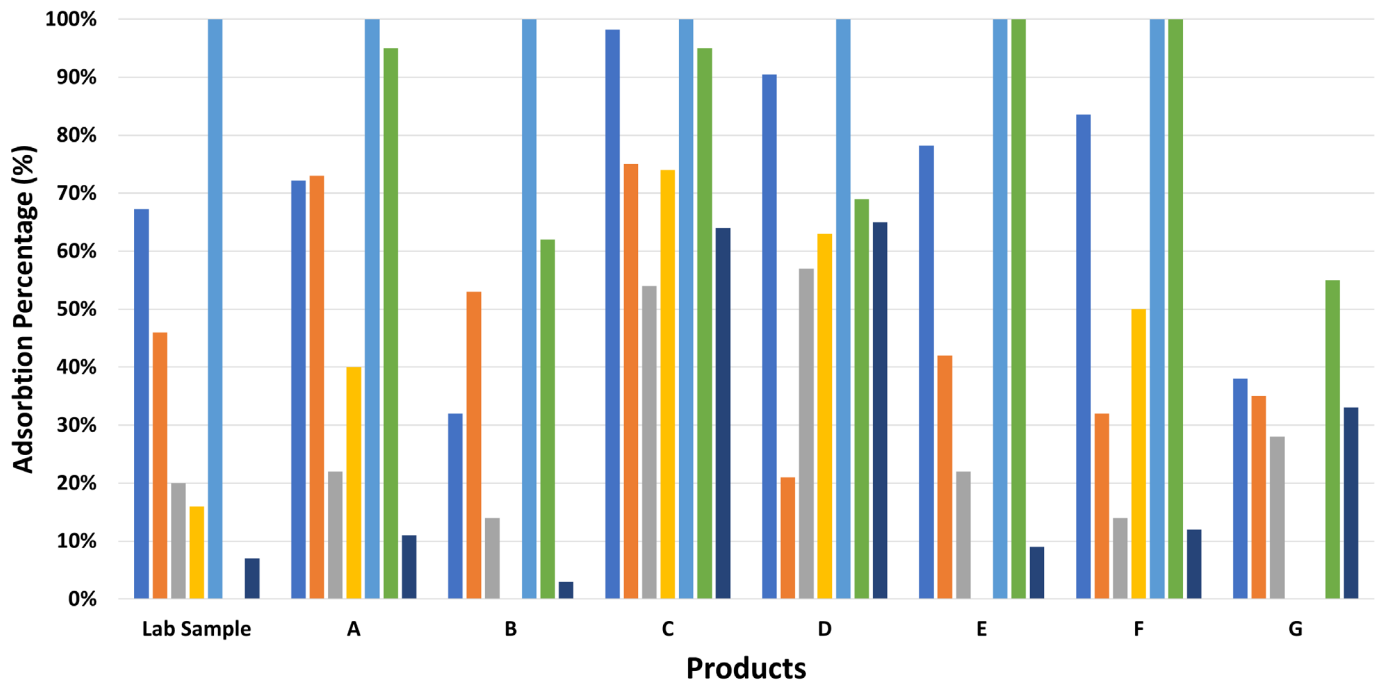

## Biotoxins Wreak Havoc on the Immune System and Gut Microbiome

### Technology with Purpose

In our pursuit to feed the globe, we have put immense pressure on our animals' ability to survive in a world filled with dangerous pathogens, molds, wild yeasts, forever chemicals and toxins. Dairy cows are dependent on their immune systems to neutralize and destroy these potential dangers. To achieve this, nature has developed various strategies to attack or neutralize these dangers in multiple ways. Intercept FEND harnesses nature's strategies, delivering unmatched immune support for your cows, just as nature intended.

## FEND – Forever Chemicals (PFAS) and Endotoxins

Mycotoxin Product Analysis (6.5 pH)

■ ZEA ■ DON ■ FB1 ■ T2 ■ AFB1 ■ EV ■ OA

# Multicomponent Solutions

Reduced Intake or Feed Refusal: **Feed Yeast**

Digestive Bacterial Infections/Endotoxins: **Feed Bacillus Strains**

Reduced Nutrient Absorption: **Feed Enzymes and Probiotics**

Altered Endocrine and Exocrine Systems: **Provide Immune Support**

Suppressed Immune Function and Inflammation: **Feed Immune Modulators**

Altered Liver Function: **Feed PhytoGENICS**

**“A single arrow is easily broken, but not ten in a bundle.”  
28 grams/head/day Includes:**

**Immune Modulators (I.P.S.<sup>®</sup>)**

**Yeast Cell Wall**

**Live Yeast**

**Yeast Culture**

**Enzymes**

**Bacillus Strains**

**Pre, Pro and Postbiotics**

**Yucca Schidigera**

**PhytoGENICS**

**Bentonite Clay**
